## Principal Engineer & Development Manager

iManage LLC (Chicago & San Francisco) – 5 years

---

iManage provides the leading document and email management system used by 3000 companies and over 1 million professionals worldwide across cloud and on-premises offerings. iManage cloud has been onboarding 1 new customer a day for 2 years in a row.

I lead the *iManage Work 10* team that built the modern, responsive web interface of this the flagship product. Web based screens are reused within Microsoft Word, Excel and Outlook (Windows & Mac), Gmail, the iOS app, Dropbox-style drive sync, and an Electron based Mac client. It also provides a platform for partners to integrate their own applications. I also lead the *iManage Share* product team – this product offers a cloud-based document sharing solution. Dual role: Technical architect & Manager to 10 engineers.

## Software Designer VI

Hewlett Packard Enterprise (San Francisco) – 4 years

---

**HP Flow** – Cloud based service to facilitate SMBs to convert paper records to electronic format using HP Multi-Function Print and Scan devices. Backbone JS, Bootstrap and jQuery. Java based REST APIs.

## Senior Software Engineer

Autonomy Inc (Chicago) – 3 years

---

**Universal Search** – Highly customizable web-based search interface to Autonomy's IDOL indexer. ExtJS on the frontend, ASP.NET/IIS and Java Servlet/Tomcat backend. Senior consultant at *Goldman Sachs* New York to help design search index architecture.

**Social Media Governance** – Monitoring and governance solution for regulated Financial services firms. Bootstrap, Squid proxy, Facebook, Twitter and LinkedIn apps

## Senior Software Engineer
